PROFILE

Proactive IT Manager with expertise in infrastructure, security, and IT operations. Skilled in scaling and optimizing IT environments, ensuring high availability and compliance (SOC 2). Strong track record of leading projects, managing vendors, and improving processes. Adept at aligning technology with business goals, driving efficiency, and enhancing system reliability.

EXPERIENCE

2022 - 2024 | **IT manager** at **AquivaLabs**

- Fully owned and managed the company's IT infrastructure, including cloud services, networks, security, and DevOps.
- Led the SOC 2 certification process, implementing security policies, access controls, and IT risk monitoring.
- Developed and executed the IT strategy, optimizing operational processes and improving infrastructure reliability.
- Managed IT procurement, budgeting, and vendor selection to scale business operations.
- Implemented automated access management, patching, and monitoring processes, reducing operational overhead and minimizing incidents.
- Effectively acted as the Head of IT, making strategic and operational decisions for the company's IT systems.

2020 - 2022 | **DevOps TeamLead** at **Sber**

- Led the DevOps team supporting multiple business units, ensuring scalable and secure infrastructure pipelines.
- Collaborated with senior management to establish best practices for security and compliance.
- Drove the standardization of infrastructure automation, reducing deployment time and increasing system reliability.
- Integrated security best practices into DevOps workflows, ensuring compliance with banking cybersecurity policies.
