Nikita Zinin

Middle Front-End Developer | Vue.js, React, TypeScript
Tbilisi, Georgia

Summary

I'm a front-end developer with over four years of professional experience specializing in Vue.js, Nuxt.js, TypeScript and React. My expertise includes building responsive, optimized web applications, and managing complex front-end architectures. For now, I'm guided by Feature-Sliced Design with Domain-Driven Design (DDD). I have experience in automated testing (e2e, unit, ui testing), create pixel-perfect layout if needed. I have experience in integrating third-party APIs, e.g. Google Captcha. My focus lies in creating maintainable and scalable codebases, ensuring excellent UI/UX through thoughtful implementations of advanced CSS techniques, and optimizing applications for performance and SEO. I have experience in Olympiad programming.

Experience

Magic Advertising & Marketing LTD

Middle Front-End Developer
September 2025 - Present (9 months)

Project description: Dating website

Tech stack: Vue 3, Typescript, Tailwind, Pinia, Vitest, Storybook, Quasar Framework, PostHog

- Architected and built a configurable profile builder from scratch
- Built subscription system
- Built an internal uikit (+storybook)
- Implemented analytics and user behaviour tracking (PostHog)

Marketnet Technologies

Front-End Developer
August 2022 - September 2025 (3 years 2 months)
Dubai, United Arab Emirates

Project description: marketplaces for tours of different themes and

customizable CRM for tour authors.

Tech stack: Vue 2/3, Nuxt 2/3, Typescript, SCSS, i18n, pinia, vitest (for legacy projects: vue-property-decorator, vuetify).

- Development and support of a custom engine for marketplace sites (5+ sites)
- Development and support of CRM, including all processes for tour company work (tracking/management of requests, payments, reports, document generation, filling tourists, tour creation, constructor for author's sites, sumsub verification, stripe).
- Development of "Tour Options" feature on all sites and CRM. Creation of tour variant with some differences in information/program/dates. Displaying differences between all tour variants (there are about 200 fields, 16 types in total). Merge differences.
- Refactoring most of the projects from Nuxt 2 (Vue 2 Options api/vue-property-decorator) to Nuxt 3 (Vue 3 Composition api)
- Utilizing Feature-Sliced Design architectural methodology with DDD concepts
- Development of Jira ticket monitoring service (For managers)
- Development of a service for managing employees in group work chats (telegram api)
- Developed CLI for easy creation of domains/components/composables on projects
- Support PDF generator on Vue 3 SSR, puppeteer.

Freelance

Front-End Developer

June 2021 - July 2022 (1 year 2 months)

Throughout the year I worked on various freelance projects, such as:

"Kinosmena": Telegram Web App project on React, shift monitoring in movie production. Formation of financial documents (reports, salaries).

"Restaraunt": Project on Vue 3 (Vuetify, Firebase) for a restaurant. One site for menu display, another as CRM for menu management.

"ILearn": Test project for educational institutions containing different services: messenger, exams, to-do list, news. Front-end written by me using Vue 2, Firebase as a data store

Education

High School of Physics and Technology
