PROFILE

A professional Java developer with 7 years of experience. Developed web applications for electronic document management. Described, implemented, and expanded integration mechanisms using REST, SOAP, AMQP, and File Sharing. Well-versed in SSO principles (based on Keycloak).

EXPERIENCE

● 2018 - 2025

ООО "Ситек" (Citeck)

BACKEND JAVA DEVELOPER, Tomsk
Company specialization - Software development for BPM system **Citeck ECOS**
citeck.ru

Responsibilities:

- Development of new modules and services in Java and Kotlin
- Integration with third-party systems
- Analysis, time estimation and task decomposition for team members
- Designing microservices
- Tech-leading and stuff training

Achievements:

- Developed useful services for simplifying the system configuration, as well as for some integrations
- Designed and developed email message processor. This expanded the system's capabilities and allowed users to process requests by sending templated email messages.
- Integrated OSGi using the Apache Felix library. This accelerated the development of integration solutions by 2 times.
- Independently led the project and developed the architecture of new platform modules and integrations
- Developed a tool for unifying developer workflows (from sequential builds to setting up the necessary environment, including Docker containers) using Bash scripts and JSON templates. This saved developers over 2 hours of time per day.

EDUCATION

● 2015 - 2019

Bachelor

TUSUR, Tomsk
Informatics and Computer Engineering
