## SKILLS

- JavaScript, HTML, CSS, Typescript
- React, Next.js, Redux, Zustand
- Webpack & Module Federation, Vite, Git, Teamcity, Gitlab
- Interaction with backend following REST API principles
- Experience in implementing CI/CD using Teamcity and Gitlab
- Experience working with popular UI libraries
- Development of custom UI libraries based on client design systems

## EDUCATION

2021

RS School

Frontend Developer

2019

Saratov State Technical University

Yu.A. Gagarin, Saratov

Institute of Energy and Transport

Systems, Logistics (Bachelor, Master)

## EXPERIENCE

Junior Frontend Developer, RS School

February 2020 - April 2021

- Studied the main technologies and tools for developing web applications, such as HTML, CSS, JS, React, Webpack, Git, etc.
- Developed educational projects of varying complexity. For example, building one-page websites in HTML and CSS, developing logical casual browser games using JS and Phaser.JS, developing SPA using React and TypeScript for learning to code, traveling and tracking COVID statistics.
- Developed individual projects and in teams of up to 5 people

Frontend Developer, Neoflex

April 2021 - until now

- Development of web applications using modern frameworks and tools such as React, Typescript, Webpack Module Federation
- Development of custom UI libraries based on client design systems to create high-quality web applications.
- Development and maintenance of Storybook for projects.
- Experience working in large, distributed teams across the country. Teams included up to 30 people.
- Mentoring in the Neoflex training center, conducting interviews, recording video lectures, and supervising educational projects.
- Expert and jury in two hackathons organized by Neoflex.

## ACHIEVEMENTS

- Successfully implemented Storybook in a large banking project. This accelerated the onboarding of new developers, simplified updating design system, and simplified navigation for content managers.
- Migrated a banking project to a microfrontend architecture using the Webpack Module Federation. This brought a several of benefits, including logical separation of teams by business tasks, increased system reliability, and simplified integration of new business logic and functionality.

## LANGUAGES

- Russian (native)
- English (level B1)
