Education

- **National Mining University**
  Master's , "Engineering-Technology"
  Completed in 2016

- **TEB-Educacja, Poland**
  Back-end, Front-End
  Completed in 2022

Skill

- Python
- Flask, Django
- HTML, CSS, JavaScript
- CAD, CAM programs
- English languare: A2
- Polish languare: A2

Hobbi

- Books and Literature
- Chess
- Puzzles
- Running

Annotation

I independently learned Python using literature and ChatGPT, as traditional educational courses were not effective for me. I applied my knowledge to develop mini-games, create a Telegram Bot, and utilized various APIs to expand the interfaces of my projects. Additionally, I completed my own mini-project where I showcased my skills in interacting with the Flask microframework. I will provide all the mentioned projects through a link to my portfolio. At present, I am open to new experiences and acquiring further knowledge.

Work Experience

Mechanical Engineer / Design Engineer
LLC TechSupplies | 2016 - 2018

- Development and Modeling of Cutting Tools.
- Designing Technical Fixtures for Mechanical and Thermal Metal Processing.
- Modeling and Calculating Tool Path for Processing Complex Surfaces on CNC Machines.
- Comprehensive Documentation Support for Products at All Stages of Manufacturing.

Mechanical Engineer / Design Engineer
LLC TechFixture | 2018 - 2019

- Development and Modeling of Cutting Tools.
- Designing Technical Fixtures for Mechanical and Thermal Metal Processing.
- Modeling and Calculating Tool Path for Processing Complex Surfaces on CNC Machines.
- Comprehensive Documentation Support for Products at All Stages of Manufacturing.

Goals

My objective is to become a valuable team member. I aim to attain the Senior level in the shortest possible timeframe. I plan to study technologies related to digital information manipulation and processing. I aspire to be a proficient developer and achieve excellence in my field.
